**COMMUNITY INTEGRATED PARAMEDICINE**  
**Program Protocol**  
**CIP PROGRAM ENROLLMENT**

Initial Date: July 23, 2020

Revised Date:

Section 11-06

---

**Purpose:** To provide guidelines for patient enrollment into Community Integrated Paramedicine Programs.

- I. Enrollment to a CIP program will be necessary in the following situations:
  - a. A physician's referral
  - b. Anticipation of more than 1 visit (includes but not limited to phone, telehealth/telemedicine, in person).
- II. Enrollment will include:
  - a. Physician's referral (physician name should be documented in EPCR)
  - b. Documented patient consent
  - c. Documented intake assessment including but not limited to:
    - i. Physical assessment with notation to overall physical and mental statuses and limitations both physical and cognitive
    - ii. Fall risk reduction assessment **see Fall Risk Reduction Assessment protocol**
    - iii. Social determinants of health assessment **see SDOH Assessment protocol**
    - iv. Medication audit **see Medication Audit protocol** (optional)
  - d. Development of a service plan/care plan
- III. Patient enrollment including the intake assessment must be documented within the EPCR or attached to the EPCR
- IV. Whenever possible CIP services should work in conjunction with already established services available within the community.
